

TNMU Training Centre for Minimally Invasive Surgery Technologies

Ternopil
Maidan Voli, 1
Telephone (0352) 52-78-55

Since 2006, advanced training courses
"Laparoscopic and other minimally invasive
technologies in surgery and urology" are held in
I.Horbachevsky Ternopil National Medical University.

The main task of the Training Centre is to train highly qualified specialists in the field of laparoscopic surgery.

At the course participants' disposal there are:

- laparoscopic surgical equipment
- up-to-date manipulative training models
- specialized literature

For 12 years, more than 900 course participants from all parts of Ukraine have passed specialization courses in laparoscopic surgery.

Proper living conditions and perfect learning environment were created to ensure maximum quality of training.

Minimally invasive surgical interventions on animals are performed by the course participants under the supervision of an experienced teacher and independently on modern laparoscopic equipment.

TNMU students have the possibility to participate in the laparoscopic surgery courses.
