

ISMS 2020

XXVII International Symposium on Morphological Sciences
CELL, TISSUE, ORGANS - EXPERIENCE, INNOVATION AND PROGRESS

Dear Korda Mikhail Mikhaylovich

It is a great honor for us to invite You and colleagues of the University entrusted to You to participate in the XXVII International Symposium of morphological Sciences, which will be held on June 4-7, 2020 in Aktobe, Kazakhstan.

"ISMS 2020" will be held for the first time in the territory of independent States. This is a scientific platform that will expand the scientific ties of scientists of the CIS, Europe, Central Asia, Africa and America, will serve as a start to the development of new scientific collaborations.

This world-scale Symposium is held every two years and brings together experts in various fields, presenting their research and achievements, having a morphological basis of discoveries and evidence.

For the first time, ISMS 2020 includes a separate section for young scientists. Students will have the opportunity to present their work in the form of abstracts, oral and poster presentations.

Sections "Medical Education" and "Applied morphology in Sport Medicine" present new directions in the work of the Congress, which are created at the request of scientists in view of the relevance and need for exchange.

All scientific abstracts will be published in the journal "Annals of Anatomy", indexed in the databases of Science Citation Index, Scopus, PubMed/Medline, etc., the impact factor of the journal 2,241

Full information can be found on the website
